[REDACTED]

[REDACTED] the southerly ballast wharf [REDACTED] was in very good condition. It was a metal wharf of channel iron and it had cement corners on top. There were two sets of railroad tracks on the wharf. On the outer edge, there were four cranes which operated on tracks; the cranes worked very fast and satisfactorily. [REDACTED] the water depth at the wharf was 24 feet.

Just north of the southerly ballast wharf, some new wharf construction was observed.

[REDACTED] A naval vessel which had the appearance of a torpedo boat came up from the harbor which was located farther downriver.

[REDACTED] It was a very old type; it had one stack and three small guns, about 75 mm each. [REDACTED]

[REDACTED] about 15 nautical miles out from Klaipeda, a fast-moving motor boat was observed at a great distance. It was possibly an MFB.
